WORK EXPERIENCE

Computer Scientist

Belzabar Software Design

06/2024 - Present

Remote

Achievements/Tasks

- Integrated OAuth2 on the backend to securely manage client credentials and streamline token exchange, reducing manual token handling by 100% and ensuring zero data exposure.
- Designed and implemented a backend-driven organization settings module with scalable database configurations, enabling 100% accurate nested updates and deletions while reducing config-related bugs by 80%.
- Developed the backend for a centralized Help Text System with validation logic and a two-step review workflow, enhancing data integrity and streamlining content management by 90%.
- **Tech Used:** AngularTS, RxJS, Lodash, SCSS, Dragula, material UI, NodeJS, ExpressJS

Software Developer

Belzabar Software Design

08/2023 - 06/2024

Remote

Achievements/Tasks

- Built scalable front-end apps using Angular and TypeScript, and developed 5+ backend APIs with Node.js and Express, improving performance by 30%.
- Collaborated in agile teams, contributing to 5+ feature releases and a 30% boost in sprint delivery efficiency.

EDUCATION

Bachelor of Technology

Galgotias University

05/2020 - 05/2024

PROJECTS

Task Management System

- **Tech Used:** MongoDB, ExpressJS, ReactJS, NodeJS
- **Features :** Implemented user registration and authentication, enabling 100% secure access with unique user sessions and reducing unauthorized access by over 95% for personalized communication.
- **Real-time Notes :** Anyone from anywhere can save, delete and update the notes.
- **Github :** <https://github.com/SAURABH200301/Task-Management-app>

Join-A Chatting App

- **Tech Used:** ReactJS, FireBase, NodeJS
- Built a real-time chat app using ReactJS and Firebase, supporting 1:1 and group messaging with 100% live sync and less than 200ms message delivery latency.
- **Live link :** <https://chat-app-49705.web.app>
- **Github Link:** <https://github.com/SAURABH200301/Chat-App>

ACHIEVEMENTS

452 AIR, Coding Ninja (08/2023)

Winner of Day Minus One
